

Sole Provider Attestation Letter

To Whom This May Concern,

On behalf of Les Solutions Innov2Learn Inc., I hereby certify that the **Baby-S (SKU: PEB01)**, a **simulated baby scale**, developed and produced by our company, is, as of today and to the best of our knowledge, the sole simulator of its kind.

This tangible/true-feel device has been specifically designed to be affixed on standard baby scales, such as the Health o meter model **553KL**, and to display a pretended weight reading when used with baby manikins (from low- to high-fidelity).

The **Baby-S** is Bluetooth remote-controlled, powered by a rechargeable battery, and requires operation through a mobile application available on the App Store and Google Play/Play Store, as well as through a web-based application on computers, electronic tablets, and mobile phones.

Yours Sincerely,

Mike Boutin, CEO at Innov2Learn
