

Sole Provider Attestation Letter

To Whom This May Concern,

On behalf of Les Solutions Innov2Learn Inc., I hereby certify that the **SP Trigger (SKU: TPT01)**, developed and produced by our company, is, as of today and to the best of our knowledge, the sole simulator of its kind.

This tangible/true-feel device has been specifically designed for standardized patients (actors) to actively trigger simulated readings during training scenarios. It can be used in conjunction with the **SpotV II, Thermo, and Thermo+** to enhance realism and interactivity in simulation sessions.

The **SP Trigger** is Bluetooth remote-controlled, powered by a rechargeable battery, and requires operation through a mobile application available on the App Store and Google Play/Play Store, as well as through a web-based application on computers, electronic tablets, and mobile phones.

Yours Sincerely,

Mike Boutin, CEO at Innov2Learn
