

## Sole Provider Attestation Letter

To Whom This May Concern,

On behalf of Les Solutions Innov2Learn Inc., I hereby certify that the **Sed-A (SKU: SDA01), a simulated anesthesia monitor**, developed and produced by our company, is, as of today and to the best of our knowledge, the sole simulator of its kind.

This tangible/true-feel device has been specifically designed to display pretended anesthesia monitoring parameters on standardized patients (actors) and manikins (either animated/robotic or not), enhancing the realism of perioperative and anesthesia training.

The **Sed-A** is Bluetooth remote-controlled, powered by a rechargeable battery, and requires operation through a mobile application available on the App Store and Google Play/Play Store, as well as through a web-based application on computers, electronic tablets, and mobile phones.

Yours Sincerely,

Mike Boutin, CEO at Innov2Learn
