

Sole Provider Attestation Letter

To Whom This May Concern,

On behalf of Les Solutions Innov2Learn Inc., I hereby certify that the **VoiceQast Kit (SKU: VCK01)**, an all-in-one audio system for healthcare simulation, developed and assembled by our company, is, as of today and to the best of our knowledge, the sole simulator accessory of its kind.

This tangible/true-feel kit enables:

- **voice changing** to give a voice to a dummy or manikin,
- **broadcasting** colored codes or group instructions,
- and **secure, discreet communication** with a single participant.

The **VoiceQast Kit** includes a protective case, tablet, Bluetooth receiver, earpiece with disposable tips, and a rechargeable speaker. It is Bluetooth-enabled, powered by rechargeable components, and requires operation through the Innov2Learn application (mobile and web).

Yours Sincerely,

Mike Boutin, CEO at Innov2Learn
