① **Download**
- The Innov2learn app from the Play Store or App Store.

② **Turn on the device**
- Press and hold the power button until something appears on the screen.*
- For the OXI, a single press is enough.
  * Make sure to unplug the device before using it.

③ **Enable Bluetooth**
- Grant all permissions requested by the app.
- Open the app & click on "Connect."

④ **Select**
- The devices you want to pair.
- Tap the icon at the bottom right to secure the connection.

⑤ **Start your simulation**
- Program a reading (Preset Mode) for the Gluco range, Oxi, Forehead-T, and Thermo range (if equipped with the Thermo SP Trigger) when no detection has occurred. Finalize the value entry by clicking "Preset."

- For real-time readings (when detection occurs, or for CO_2-Detect, SpotV II, and the Thermo range WITHOUT the Thermo SP Trigger), send the entered values directly by selecting the send icon.
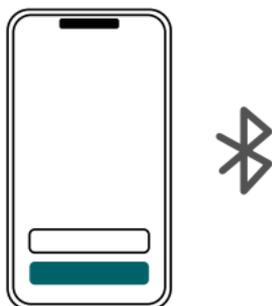

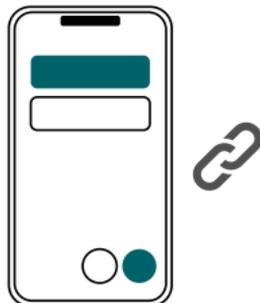

1. Download Innov2Learn App

2. Turn on the device

3. Enable Bluetooth

4. Select

5. Start your simulation
